Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Conclusion

This application is in condition for allowance except for the following formal matters:

The examiner of record objects to the language in claims 1 and 10, lines 13 and 12, respectively: "said electrode device having the following respective features". In accordance to current Patent Office practice, this particular claim language should be amended with language such as "further comprising", "further consisting", or "further including" according to the level of intellectual property coverage that applicant desires for this claim. Additionally, in part A of the claim, the phrase "is in a non-joined state" does not appear to properly connect with the description of the "place where the electrode layer is formed".

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not disclose or suggest, inter alia, an electrode device having a cup-like support, a sheet-like support, and having at least a place where said electrode layer is formed of the superimposing part between the outer flange

Art Unit: 3763

of the cup-like support and the outer part of the sheet-like support, and wherein the outer flange and the outer part have a leakage prevention means.
